- RHUS COTINUS ROYAL PURPLE -

* (New dark purple-red leaf Smokebush) *

- There are several varieties of Purple Smokebush although Royal Purple
 * is considered the very best. A number of varieties of Smokebush have
 - been tried out in the nursery with Royal Purple always turning out to
 * be the most outstanding. I am convinced of this to the extent that it
 - is the only one now being propagated in the nursery. Royal Purple
 * keeps its rich dark purple reddish colored foliage from Spring to late
 - Fall. In late summer the matured leaves show a mottled edge which is

New! "Royal Purple" SMOKEBUSH

(*Rhus Cotinus*, Royal Purple)

Rhus Cotinus ROYAL PURPLE - New dark Purple-red Leaf Smokebush

There are several varieties of Purple Smokebush although Royal Purple is considered the very best. Several varieties of Smokebush have been tried out in the nursery with Royal Purple always turning out to be the most outstanding. I am convinced of this to the extent that it is the only one now being propagated in the nursery. Royal Purple keeps its rich dark purple reddish colored foliage from spring to late fall. In late summer the matured leaves show a mottled edge which is a light red edge around the

dark purple leaf. It is an outstanding plant in that it draws the attention of all who visit the nursery and is greatly admired for its brilliant foliage. The foliage is darker than any red Japanese Maple. The plant is adaptable for use as a lawn specimen especially in locations where the Japanese Maple is not hardy. Royal Purple is the only purple Smokebush to receive a Certificate of Merit from the Royal Horticultural Society. The branches make an excellent filler for bouquets, especially with Chrysanthemums.

2-3 ft., B.R., 2-5 branches, 1 to 99, \$1.75 each; 100 or more, \$1.50 each.

3-4 ft., B.R. & B&B, per 10, \$3.50 each; per 100, \$3.00 each.

Orders cannot be accepted for B&B stock which require boxing.
